Эмуляция и измерение потерь пакетов в глобальных сетях

Абд эль хай мохамад РУДН, Москва, Российская Федерация

Введение

Основной целью работы является получение навыков проведения интерактивных экспериментов в среде Mininet по исследованию параметров сети, связанных с потерей, дублированием, изменением порядка и повреждением пакетов при передаче данных. Эти параметры влияют на производительность протоколов и сетей.
